HARDEST WORKER ON THE FARM.

OUR 7816 DLX provides you with maximum loading capability. With 12 feet of suction hose and a truck loading kit, it can easily move 5500 Bu/hr of corn or barley. At the heart of all this power is Walinga's SRT Sound Reduction Blower and our 2018 Super hardened airlock. The 7816 DLX comes with accessories. See Walinga.com for complete details. Walinga has been building tough reliable equipment for over sixty years which is why farmers agree; for performance and durability, a Walinga Vac is tough to beat in the long run.

Stukenholtz Laboratory Inc.

Celebrating 48 Years of Agricultural Testing

In 1970, there were no commercial soil and plant testing laboratories in Idaho. Farmers applied fertilizers based upon educated guesswork. Dr. Dale Stukenholtz and his wife Joyce saw an opportunity to build a business and started a soil and plant testing laboratory and field consulting service based in Twin Falls, Idaho. Dr. Stukenholtz had an unusually diverse background as an educator at the University of Nebraska, an agronomist in the fertilizer industry, and a farmer, and he saw a need for more modern fertilizer recommendations to produce greater yields at less cost. His clients were the growers, so he could make unbiased recommendations that maximized economic return to the farmer. After extensive field research, he developed these improved fertilizer recommendations that quickly became popular with growers and form the basis for nearly all fertilizer applications in the intermountain west area. Stukenholtz Laboratory clients include growers from all neighboring states and several foreign countries including Australia, Canada, Egypt, Russia, Mexico and New Zealand.

Stukenholtz Laboratory provides 1 to 2 day service, including picking up and delivery time, across Southern Idaho from St. Anthony and Grace to Parma and Homedale. Results can be delivered, mailed, faxed, or pulled from the Laboratory's webpage: www.stukenholtz.com. To improve their service, Joyce and Dale Stukenholtz expanded the laboratory 21 years ago, installed the latest in computerized instrumentation and quality control, and made it the most modern and well equipped agricultural laboratory in their market area.

Critical to the success of Idaho's most efficient laboratory and largest field consulting firm has been its personnel. Dr. Stukenholtz has had a PhD in Soil Fertility and Plant Nutrition since 1964 and his son and Laboratory Manager Paul has nearly completed his own. Consulting agronomists include J.P. Kruck-

eberg of American Falls, a 39 year veteran of field consulting and the most successful single agronomist in the state, and Bart Kunz. The Laboratory and office staff are equally good.

Analysis room at Stukenholtz Laboratory Inc.

Stukenholtz Laboratory continues with research and improvement. In conjunction with the Idaho Crop Production Association and University of Idaho CFEP research project, Stukenholtz Laboratory has helped to ensure that fertilizer recommendations in Idaho are the most cost efficient possible and produce the maximum economic yield while protecting the environment. Stukenholtz Laboratory personnel have conducted field research on over 40 different products and continue to be the experts at "cutting edge" agricultural technology. As we end our first 47 years of business and begin our next, we would like to thank our current and former employees for their dedicated work and our customers and clients for their years of support. 🍷

Uibly Bean Knife and Uibly Peanut Digger Blades Give You the Advant-EDGE!

Hundreds of hard edible bean farmers have been taking advantage of the Uibly bean knife for over sixty years. **Attention bean, seed and organic farmers**

While maintaining the highest standard of quality, Uibly bean knives are still the best way to cut the tap roots and get a higher quality bean while producing fluffier windrows, reducing labor, reducing stones and dirt in windrows, and aiding in your combine's overall performance.

There has been some speculation about the acceptability of the direct harvest system due to the high losses of beans, therefore keep using the Uibly Bean Knife for the best possible cut and quality for your money. Do what hundreds have already done. Make Uibly Your Advant-EDGE.

Peanut farmers rejoice!

Uibly Peanut Digger Blade Manufacturing, Inc., a subsidiary of Uibly Bean Knife Mfg., Inc., received a patent for the Uibly Lifting Fingers, stainless steel lifting fingers that are flat and curved upward to better guide peanuts up on to the top of the elevator during the digging process.

Used with their patented Uibly Digger blades, which have a thin, hard-faced edge to stay sharp and always cut the tap root, the lifting fingers and the smaller diameter Uibly 6-inch Bottom Elevator Idler Wheels raise the peanuts without turbulence and in a smooth, uniform ribbon to the top of the elevator.

Northwest Liquid Transport, INC.

NWL was founded in 1987 by Wayne Groen. From that time the company has steadily grown from an owner operator business to the company you see here today. From a single truck in Wayne's parents' backyard, to multiple trucks, equipment, and employees. It's easy to say this company has expanded. A large part of NWL's success is due to our faithful customers and the hard work and dedication of our employees and managers. However, we believe that the success of the business ultimately comes from the Lord God himself.

To hear more about our company, you can visit our website or call us at (360) 354-7409.

Don's Irrigation LLC

Friendly, reliable service since 1996

Don's Irrigation LLC was founded 22 years ago by Donald Ford, and it provides the Magic Valley with high-quality irrigation products and services. We built our business with our number one focus being keeping the highest crop yield per dollar spent on your systems.

Our team has over 100 years of combined experience, specializing in all brands of pumps, pivots, ponds, PVCs, aluminum, mainline, and wheel lines. We also have one of the largest combined agricultural supply and equipment departments in the Magic Valley area, and our prices are unbeatable.

You can always rely on us to get the job done right. Our professionals provide expert farm irrigation services and quality irrigation parts. Call or visit us today for great deals!

HUNDERBIRD IRRIGATION OF IDAHO

Thunderbird Irrigation of Idaho is a manufacturer of the Thunderbird Wheelines that are sold throughout the country. Thunderbird Wheelines are known for their End-Drive Wheel-line System. Thunderbird Irrigation has moved from it's California facility to a newly expanded facility in Idaho and is operating under the name Thunderbird Irrigation of Idaho.

Thunderbird is a Lateral Wheeline, or basically irrigation pipes that move on wheels. It is powered by an End-Drive, versus a Center-Drive, system which requires only a gas powered engine on the end of the system. Low Labor, Low Operating Costs, and Low Maintenance make it one of the most cost effective systems for mechanized water delivery.

Walinga Bulk Feed Bodies & Grain-Vacs

From concept, design and through production, Walinga meets the customer's needs at every step. Creating outstanding products that are innovative and durable, with some client's vehicles being passed from generation to generation.

Walinga is a leading North American manufacturer of transportation equipment and portable pneumatic conveying systems for grain, feed, seed... virtually any dry bulk material. Walinga is still a family owned and operated company. The total commitment to quality is not only our inheritance - it's our foundation for the future.

Walinga products represent the best in manufacturing excellence. Our in-house engineering and design teams utilize the most current computer technology available. State of the art equipment, combined with over 60 years of experience, ensures that our customers receive unsurpassed quality.

Comprehensive engineering capabilities allow us to offer sizes, capacities, features and options that are specifically job-matched according to individual requirements. The services of our Engineering Department are available to our customers to assist in the selection of the properly specified chassis. Every Walinga vehicle is designed and produced to best fulfill its designated function.

Custom-built aluminum feed bodies and trailers, pneumatic conveying systems, recycling trucks and bodies, aluminum and steel dump bodies... each built according to exact stan-

dards. Every stage of the manufacturing process from design to completion is performed by Walinga. The result - a cost effective, durable product line that responds to any challenge with premium.

Walinga Agri-Vac

The only system you'll ever need. Gives one-person total grain-handling capability! Do it all with the Walinga Agri-Vac. Fill or empty storage facility being used. The Walinga Agri-Vac puts an end to legs, augers, sweeps and shovels. Grain handling has never been simpler, safer or healthier.

Just couple the Agri-Vac to your tractor and drive into position. Lightweight vacuum/pressure hoses attach in seconds and flex easily. Suddenly even tight spots and awkward angles are no problem!

Bulk Feed Trailers and Bodies

Walinga Inc. has been manufacturing bulk feed transportation equipment for more than 60 years. In this time we have become committed to an ongoing program of research and development. In response to the increasingly diverse needs of our customers Walinga is and will continue to be on the forefront of technological evolution.

The options and features of the Walinga Bulk Feed Delivery Units are numerous. Walinga Bulk Feed Delivery Units can help you in your quest to increase production, performance, and efficiency.

Sunny D Mfg., Co. Inc – *The Oregon Roadrunner*

The Oregon Roadrunner, manufactured by Sunny D Manufacturing Company, Inc., is the all purpose machine when it comes to loading and unloading blocks of hay, everything from a stack of bales in the field to a

six-pack of 3x4 bales. What used to take several people hours to buck the hay, whether loading trucks, unloading trucks, or moving the hay from one truck to another, now takes one person just minutes to accomplish. There is no other machine that can match it.

Humble Beginnings

In 1971, Art Davina – then a rancher in Bonanza Oregon –

saw the need, designed and built the first Oregon Roadrunner. That machine is still being used today.

While struggling through the hard times, redesigning to incorporate new ideas and improving on old ones, and building a strong customer base one customer at a time, Art managed to build his back-yard business to a point where he was able to open his first shop. By 1985 the business was large enough that he began the process of incorporating it. Later, needing more space to meet customer demand, he bought a larger property, and moved the business to its current location in Klamath Falls.

When health problems forced Art to take a step back and de-stress his life, he wanted to find the perfect person to take the reins. Ed Majors took over as GM in 1998 and in 2003, began the process of buying the company from Art. Today, Ed officially owns it.

Sunny D Today

From those humble beginnings in 1971 to the 21st century, Sunny D Manufacturing Company Inc. has grown to a business totaling 15 employees. Welders, fabricators, mechanics, a painter, and various support personnel create from bare metal the machine that called “The Oregon Roadrunner.” What used to be only available in white with your choice of stripe, a customer can now choose their color and design. For more information, call 1-541-884-2361, or write 4343 Highway 39, Klamath Falls, OR 97603.

“Catcher” Makes Calf Work Easier

If you own an ATV or UTV and have cattle, Dan Leo has an attachment to make working with young calves safer and easier.

“Safety is the number one goal of our durably built and user-friendly catchers,” says Leo, president of Safety Zone Calf

One person can now easily and safely process calves with Leo's Safety Zone Calf Catcher.

Catchers. “The traditional way to tag and process calves can be dangerous and often takes more than one person to do the job. With our calf catcher it's easier on the producer, the cow

and the calf. One person, who can operate an ATV or UTV, can safely work calves.”

The calf catcher is a durably constructed steel cage that mounts with ball hitches on the front and back. It works well in all types of terrains and conditions. With the front gate locked open, the driver approaches the calf and captures it in the cage by shutting the spring-loaded gate. The producer enters the pen through the open side by stepping from the ATV or UTV and moves the calf to the rear holding area where he can tag, vaccinate, weigh and even band the babies while protected from the mother cow. When finished the producer releases the calf out the back to its mother.

“Traditionally, producers have to get to the calves early after birth otherwise it can be difficult to catch and even hang on to them, and then it can require two or more people depending on the protective behavior of the mother cow while the processing takes place,” Leo notes. “With our calf catcher unit, one person can catch calves, even if they are a week or older when they have plenty of run in them. Another benefit is the calf holder located at the back of the catcher. It not only secures the calf for processing, but works very well for pairing out, as the cow can see and smell her baby and will then easily follow to another pasture or calving barn in inclement weather. Cows will follow the calf virtually anywhere!”

A Cowman's Best Friend at Calving Time!

Easy and Safe Catching!

Fits ATV's and UTV's!

Safe Release!

Now available with digital scale!

Kenny Miller, MO - “We really enjoyed the Calf Catcher this spring. Definitely saved the old body!”

Gary Theurer, KS - “Everybody needs to own your calf catcher, if they own cows. I couldn't imagine going through a calving season without it. It works perfect!”

Joan Bullin - “This is my third year using the calf catcher and I love it! We don't have calm cows and I've never had a problem with any of them hitting it. I'm 62 and I tag 600 calves a year, no problem.”

Designed for Processing Safety...

- Enables quick and safe calf catching!
- Convenient, step in access of producer!
- Holder secures calf for easy processing!
- User-friendly inside release of calf to cow!
 - Move calves easier with cow following!
- Less cow stress, mother can see and smell calf!
 - Reduces danger while working new calves!
- Quick Mount/Dismount on both ATV & UTVs!

ONE PERSON can now SAFELY and EASILY process calves without concern of the protective mother cow!

DEALER INQUIRY INVITED

PBI Parlor Systems Leading the Way in the Dairy Industry

Operating from their office in Portales, New Mexico, PBI Parlor Systems is a leading manufacturer of milking stalls and equipment for dairies around the world.

The owner, Steve Peacock, has a strong dairy business background, and an even stronger pride in his company's products. His commitment to improving dairy profits and delivering excellent customer service is unmistakable. And each of the company's employees shares his dedication.

Of course it all starts with an efficient stall design - their stalls are engineered to be the best solution for maintaining cow safety and dairy efficiency. In fact the company came into existence in the late 80's after designing a parallel stall at the request of a local dairyman.

His stall design was a winner! Good news travels fast, and word of this design spread quickly from person to person, which led to more parlor business.

Building on his design and engineering experience, the entire PBI crew continues to produce and install innovative parlor stalls all over the world. To ensure the quality of the final product, they control every stage of production. Dairies of all sizes, from small family-dairies to large mega-dairies have been fitted with PBI stalls.

Because PBI designs and builds the stalls, they are custom fitted to your unique requirements. They use heavy duty galvanized and stainless steels to provide a durable yet sleek stall with no rough

edges to hurt cows and profits. Performance excellence is ensured by their expert project installer and crew, which they make available for every installation. You will assuredly receive a quality, hassle-free installation, and on-going support.

Value is built into every PBI stall design. Low installation and maintenance costs make PBI stalls a valuable investment for dairies of all sizes. Plus their durable construction, smooth operation and labor saving design provide ongoing increased profits.

Innovation is what started PBI. Their stall designs are adaptable to suit the needs of dairies of all sizes, no matter the environment. They are compatible with all brands of milking equipment. And though innovation started PBI, service is what maintains and grows the company. PBI Parlor Systems takes pride in its continued commitment to meet and exceed their customers' needs. From the free quote they give you, through the completed installation, they maintain a hands-on approach that delivers unrivaled customer service.

But their customer support doesn't end with the sale. PBI's on-going personal contact with their clients and easy accessibility cater to meeting your needs now and later. They choose to maintain close relationships with their clients. Client feedback about stall performance is essential to PBI's commitment to developing and refining products that satisfy the needs of dairy farmers all over the globe.

For more information, call PBI Parlor Systems at 800-295-5677 or visit www.PBIParlorSystems.com

PBI PARLOR SYSTEMS Elite Stalls

The Elite Parallel Stall is our signature stall

- A powerful hydraulic cylinder operates an entire row raising the headstalls to a full 62" clearance. High enough for even your largest cow.
- Lowering of headstalls can be adjusted to your specifications.
- Rapid exit allows cows to leave at the same time.
- Counter weights are used on our patented divider gates. Nothing is spring loaded.
- This stall is offered on 26" centers for Jersey cows only, 27" centers for mixed herds or holsteins, or 28" centers for holsteins.

SweetPro Feeds of Walhalla, ND

SweetPro Feeds of Walhalla, ND produces Vitamin, Mineral and Digestive Aid supplements for livestock and has pioneered the use of Distillers Grains (DDGS) on rangeland.

Dried Distillers Grains (from ethanol production) as a carrier for supplementation provides significant benefits to the Rancher, the Feeder, the Consumer and the Land itself.

Although used in feedlot and dairy settings, until SweetPro's patented non-molasses DDG block became available for rangeland applications, the benefits of feeding Distillers Grains were unavailable to these non-bunk fed livestock.

Historically many small farmers steeped barley before feeding it to their animals. While this practice faded due to various

influences such as economies of scale, elements relating to this fermentation of grain have been refined by SweetPro Feeds. SweetPro has overcome the historic mechanical limitations and taken the science to new levels with stabilization for open range feeding, organic complexed trace minerals, four classes of viable digestive enzymes and prebiotics to deliver maximum performance potential. Feed efficiency is improved by 25%.

Additionally, a blend of cereal grains (wheat, oats, and barley malt) plus flax are used in the proprietary fermented blend additive, "ProBiotein." This assures that the most complementary amino acid profile is available.

SweetPro complements a forage based diet by NOT using starch or sugar (which can create a rumen Negative Associative Effect) as the main ingredient.

SweetPro blocks also produce a unique dynamic which both influences the total protein and the type of protein available to the animal. Total protein is improved, not just from the protein in the supplement, but also from the rumen microbes (single cell protein). SweetPro blocks contain three classes of prebiotics to feed and keep robust these rumen microbial populations. The better the microbes perform, the more single-cell protein is available to the cow when the microbe's short life-cycle ends.

The other protein dynamic in SweetPro is high bypass protein. This is protein not used in the rumen but available directly by the animal. This is most important during the two key times when the cow's protein demands are greatest, late stage pregnancy and peak milking demand.

When these protein and fiber oriented energy benefits are combined with SweetPro's strong vitamin and mineral package, ranchers have a solid tool to help reclaim the losses they'd otherwise absorb when forage is poor. Even poor quality forages can be fully utilized with pastures stretched or more animals run on the same ground.

SweetPro benefits the Rancher by improving feed efficiency 25% while promoting better herd health and fertility. Heavier "growthy" calves can be expected at weaning along with labor and fuel savings (blocks are only placed out every 10 days). It also benefits the producer by providing new options for grass finishing and putting more "Pounds on Pasture" per day than older means of vitamin and mineral supplementation.

SweetPro products also help the Feeder by allowing them to bring in healthier and heavier calves. These calves need only half the time to finish as in years past. With 25% improved feed efficiency, 400 to 800 pounds less corn is needed in the finishing process.

The Consumer benefits through a healthier meat that has much better mineral deposition and a better taste. The Land itself also gains advantages. With 25% improved feed efficiency, stress on pastures is reduced while the more efficient digestion allows for an even spread of softer stools that are much easier for dung beetles to work into the soils. Soil fertility is increased markedly over only a few years time.

SweetPro Feeds' combination of a healthy and cost-efficient vitamin and mineral delivery system along with a 25% improvement in forage feed efficiency has impacted ranching, feeding and the nation positively. www.sweetpro.com

Blood-Based Pregnancy Checks- BioPRYN Your Herd!

Over thirty years ago Dr. Garth Sasser was a professor of Animal Science at the University of Idaho. In his research he discovered a pregnancy specific protein in the maternal bloodstream of ruminant animals that is only elevated when that animal is pregnant. He developed a test called BioPRYN (Pregnant-Ruminant-Yes-No) that measures the concentration of this protein in blood and can provide an extremely accurate determination of pregnancy status in cattle, goats, sheep, bison and other ruminant animals very early in gestation (28 days post breeding).

A growing number of dairy and beef producers and their veterinarians are utilizing blood-based pregnancy testing in unique ways to complement traditional pregnancy detection methods and because BioPRYN is a proven, convenient, accurate and cost-effective way to check your animals for pregnancy that eliminates subjectivity. Some progressive producers that are using embryo transfer or synchronization protocols with artificial insemination will use BioPRYN as an early "open check" at 28 days post breeding to identify if the animal needs to be reintroduced to the synchronization program. Other producers and their veterinarians will use a BioPRYN check to supplement monthly or biweekly herd health checks to identify those open cows as early as possible and to avoid the entire herd being locked up for extended amounts of time on pregnancy-check day. BioPRYN is also a useful tool for a reconfirmation pregnancy check later in gestation to identify the small percentage of cows that will experience embryonic loss and not carry to term.

The process consists of drawing a small blood sample, usually from the tail vein, and delivering or sending samples to one of the 45 BioPRYN Affiliate Labs that have been trained and certified to provide consistent and accurate results so that you can trust the results and manage your animals accordingly.

For blood collection supplies and more information about BioPRYN and the BioPRYN Affiliate Lab network please visit bioprjn.com or call 208.882.9736.

Northern Livestock Video

Northern Livestock Video, headquartered at Billings Livestock Commission, Billings, MT is engaged in the livestock auction business through Video Satellite & Internet Marketing and is produced by a capable Northern Livestock staff. Pat Goggins introduced the video concept of selling livestock to the industry years ago and conducted the first in the world sales during the mid-1970s. Video & Internet marketing has since become a viable, legitimate tool for merchandising feeder cattle and breeding cattle.

The most important factor is to receive national competitive bidding on your livestock. The Northern Livestock Video Sales are broadcast on Satellite and Internet. In addition, the sales are aggressively promoted nationwide in the best read livestock publications around the country and nationally recognized auctioneers' will sell the sale. As a consignor, being involved in one of our Video events affords your herd more exposure than you could possibly gain on your own efforts. This is buying power.

Northern has on staff the best group of knowledgeable Representatives of any video sales company in America. They come with excellent qualifications and have firsthand knowledge of cattle breeding, feeding & carcass quality. You can work knowing they will personally represent you from the moment you sign the consignment form until the day your cattle are delivered. They are bonded, reputable, conscientious cattlemen with many years of experience in the industry. But most important they understand marketing at all levels. They will become your best friend!

The sale is conducted just like an ordinary auction sale only the livestock are not on the premises. Most of the sales will be physically held at the Billings Livestock Commission in Billings, MT where television monitors will be set of for viewing, or you can view the sale in the comfort of your home or office. Buyers will be on the seats to bid and a bank of phones will be manned to take the call-in bids from the video broadcast. They are fast paced auctions with nationwide bidding.

Keep in mind when you consign your livestock to a Northern Livestock Sale, it will be broadcast across the North America continent on Satellite as well as on the Internet. Anyone who has a "dish" or computer at home, in the office or feedlot can view the sale and bid on the livestock in "real time."

Remember, we started the video way of selling livestock, the first in the world, back in the 1970s. We know what we are doing and we would like to prove it to you. When you make the important decision to consign to Northern, call us at 1-866-616-5035.

Safety Zone Calf Catcher

Continued from page: 18

The ATV catchers sell for \$2,095 plus freight shipping. Catchers designed for UTVs are an additional \$450. Other options available include a waterproof, digital scale - especially beneficial to seedstock producers and a tow hitch that aids long distance moving.

The company sells directly to cattlemen but welcomes dealership inquiries.

“Built in both Nebraska and South Dakota plants, the calf catcher will last for generations, Sales have stretched across the U.S. with exports to Canada, Australia and France.” Leo adds.

To see it in action, check out the video on the company’s website.

Contact: Safety Zone Calf Catchers, LLC, 1146 7th Ave, Dannebrog, Neb. 68831 Phone: (877)505-0914; www.safetyzonecalfcatchers.com

get pregnant. Unlike many of our competitors, we know which of our animals are efficient because we are managed with this in mind. We are using several new and popular sires to enhance our gene pool and we can trace our cow family lines back for over a century. Our website: www.chandlerherefords.com highlights our program and the sires we are using in detail so feel free to visit and sign our guest book.

With all this past performance history from thousands of registered calves raised here, we know what our cattle are capable of. We have sold cattle to customers in nearly every state in the union. Their feed efficiency and fertility is really evident when they are asked to perform in less than ideal forage or environmental conditions. If you are looking for no compromise Hereford cattle with a history dating back for over a century then look no further. It is what we are all about. We have stood the test of time and we are here to stay.
